

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Previously Presented) An information processing system comprising:
electronic equipment and a server device,

the electronic equipment comprising:

an index information holding section holding index information that is
information for obtaining an electronic equipment identifier; and

a send information sending section for obtaining index information from the
index information holding section and sends send information containing the index
information to the server device, and

the server device comprising

an electronic equipment related information storage section storing one or
more pieces of electronic equipment related information,

an electronic equipment identifier index correspondence management section
for storing an electronic equipment identifier corresponded to the index information;

a send information receiving section for receiving the send information from the
electronic equipment; and

an information accessing section for obtaining the electronic equipment
identifier based on the index information contained in the send information received
by the send information receiving section.

2.-34. (Cancelled).

35. (Previously Presented) The information processing system according to
claim 1, wherein

the information accessing section obtains an electronic equipment identifier based on index information contained in send information received by the send information receiving section, and accesses the electronic equipment related information based on the electronic equipment identifier.

36. (Previously Presented) A server device comprising:

an electronic equipment related information storage section storing one or more pieces of electronic equipment related information;

an electronic equipment identifier index correspondence management section for storing an electronic equipment identifier corresponded to the index information;

a send information receiving section for receiving the send information from the electronic equipment; and

an information accessing section for obtaining the electronic equipment identifier based on the index information contained in the send information received by the send information receiving section.

37. (Currently Amended) The server device according to ~~claim 3~~claim 36, wherein the information accessing section obtains an electronic equipment identifier based on index information contained in send information received by the send information receiving section, and accesses the electronic equipment related information based on the electronic equipment identifier.

38. (Previously Presented) An electronic equipment to configure the information processing system according to claim 1.

39. (Previously Presented) An information processing method comprising:

a send information receiving step of receiving send information from an electronic equipment; and

and information accessing step of obtaining an electronic equipment identifier based on index information contained in send information received at the send information receiving step.

40. (Currently Amended) The information processing method according to ~~claim 6~~claim 39, wherein

at the information accessing step,

an electronic equipment identifier is obtained on the basis of index information contained in send information received at the send information receiving step, and electronic equipment related information is accessed on the basis of the electronic equipment identifier.
